SOFTWARE PROJECTS

Source code for the following projects can be shared upon request during an interview.

Chantelle Conlon Scoullar

2021 – Microsoft Teams Backend Clone 'Streams'

- A simple clone of a Microsoft teams like backend. It has core functionalities such as profiles, group messaging, personal messaging and features such as message reacting and pinning. This was my first experience building a full-scale application.
- Role: Backend software engineer
- Languages: python

2022 – Invoice Receiving Software as a Service Project

- A platform for businesses and individuals to receive invoices, designed as a part of a larger invoicing system.
- Role: Lead backend software engineer, Scrum Master
- Languages: python

2022 – Dungeon Crawler Backend

- Object oriented gaming project.
- Role: backend engineer
- Languages: Java

2022 – Blockchain Organic Fruits Supply Chain

- An application to track the organic fruits supply chain via the block chain. The focus of the project was monitoring the quality, ownership, and organic certification of fruits via smart contracts on an Ethereum based block chain.
- Role: backend engineer
- Languages: Solidity
- Demo Video – showing functionality via Remix IDE: https://drive.google.com/file/d/1EOQQ4hD9PqZEyoCAY-jGxbkKjD4x9Y6I/view?usp=sharing
- Repo: https://github.com/schummd/supply-chain

2022 – Nightcare

- A short thriller escape room game designed using Unreal Engine 4 blueprints.
- Winner of the UNSW Computer Science and Engineering's Top Projects award.
- Role: Developer
- Release: https://rinade.itch.io/nightcare

SKILLS

- Experience with Python, Java, c, SQL, Solidity, Unreal engine 4, JavaScript, React, NextJs, HTML, CSS
- Familiar with agile practices and the scrum process
- Worked with Git, Jira, Confluence
- Skilled at API development and documentation
- Client focused approach to work
- Thrives in a high pressure and fast-paced environment
- Determined and adaptive approach to problem solving
- Highly experienced with teamwork and leadership given the collaborative nature of software engineering and computer science
